

## WOtis Mission Statement:

What values/qualities we want our solution to be like (in a metaphorical way) + reflects who we are as designers  
Informed by our 4 value words:

- Independent
- Comfort
- Responsibility
- Solitude

With the users wants and needs at the forefront of our design, we as a team will focus on crafting a space which promotes independence and efficiency for how users navigate the welcoming space. As creatives we are responsible for producing design solutions that reflect the core values we believe in. Ensuring inclusivity is an overarching theme. Our welcoming space will allow the users to easily experience the sentiment of self- sufficiency, comfort in solitude, and opens the opportunity for patience to take responsibility for their personal health journeys. By combining these core values, we aim to change patients' preconceptions about what a typical hospital experience entails.
