- Northshore Hospital
- Serving 619,000

Goal- outstanding health outcomes and patients experience- improving

Principles- Data driven (research), Person centred design, Community and Clinical Led.

Data Driven

We place people at the centre of everything we do

We watch + listen to what our patients, whānau + community need + we solve problems from a person perspective

Community + Clinician-Led

We support our community + clinicians to lead healthcare redesign + innovation

We help make their ideas happen + partner with others to accelerate + scale innovation

Person Centred Design

We promote the continuous use of data to inform + improve

We work by testing + learning, embracing innovative ways of thinking + doing

Care Redesign ①

Making systematic changes to care practices + systems to improve quality, efficiency + effectiveness of patient care. Creating the future of healthcare by reengineering care around value

[» View more](#)

Digital Technology + Data ②

Adoption of new technologies + data systems so that we can understand what matters most to patients, + clinicians can track + continuously improve patients' outcomes + experience

[» View more](#)

Research + Innovation ③

Research + knowledge in new models of care, innovations + evidence-based practice + the integration of this knowledge in clinical care

[» View more](#)

Health Leadership ④

Development of people with skills, experience + expertise needed to lead + champion healthcare redesign + innovation
